

# Wordathon[**GameDev**].2019.May.11

As part of the national **Science Odyssey** (<http://www.sciod.ca>), we will be running **Wordathons** in **grade 6-8** classrooms. Last year, children coded animations of 408 reading words, which were incorporated into five reading games (<http://www.cas.mcmaster.ca/~anand/SciOdy2018.html>).

*This year our goal is 1000 word animations!*

*Now we need aspiring Game Developers to learn how to turn those animations into reading games and help us make 10 games.*

*Sign up on EventBrite, and join us **Saturday May 11th, 9am-5pm** in **ETB B104** (the basement computer lab) for 7 hours of spinning your imagination into gaming gold. You will work on all aspects of the game, from graphical design to game AIs, depending on your game ideas.*

Tickets: <https://www.eventbrite.ca/e/wordathongamedev-tickets-60292114337>

This activity is FREE, and the best animations will be rewarded with a McMaster Outreach t-shirt.
